**DETAILED ACTION**

***Continued Examination Under 37 CFR 1.114***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after allowance or after an Office action under *Ex Parte Quayle*, 25 USPQ 74, 453 O.G. 213 (Comm'r Pat. 1935). Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, prosecution in this application has been reopened pursuant to 37 CFR 1.114. Applicant's submission filed on November 4, 2005 has been entered.

No amendment was filed with the request for continued examination; thus, the pending claims considered below remain Claims 92-99, 101-103, 106-117, and 158-160.

***Information Disclosure Statement***

2. Applicant's information disclosure statement of November 4, 2005 was filed after the issue fee was paid. However, the application was withdrawn from issue in order to file a request for continued examination (RCE) under 37 CFR 1.114 upon the grant of a petition under 37 CFR 1.313(c)(2). Therefore, the information disclosure statement has been considered.

The Examiner has reviewed the references cited on the information disclosure

statement and has determined that none of the cited references disclose the non-obvious novel features of the claim invention as outlined in the previous reasons for allowance. The previous reasons for allowance have been reproduced below.

***Allowable Subject Matter***

3. Claims 92-99, 101-103, 106-117, and 158-160 are allowed.

***Examiner's Statement of Reasons for Allowance***

4. The following is an examiner's statement of reasons for allowance:

While prior art was found which disclosed systems and methods using electronic tags to track and locate items such as luggage (Kaplan et al, US 3, 689,885)(Wade, William, Electronic News) and prior art was also found which disclosed procedures for conflict resolution between multiple tags using random time differentiation to respond to a polling signal (Reis et al, EP 0,467,036)(Walter et al, 5,856,788)(Werb, 6,483,427), prior art was not located in which multiple tags were polled within a specified location to identify the items and which also handled contention between the identity signals from one or more tags within the location by using a secondary identification number stored in each tag as in independent Claims 92, 101, and 106-109,. Therefore, the Examiner considers the combination of polling a plurality of electronic tags and resolving contention between the tags by the tags responding with a secondary identification code as the non-obvious novelty of the invention.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
